

Beyond Words

Thessaloniki 20-24 January 2010

Evaluation of the work done

Mrs Raffaella Carpani, the art teacher, started to work in the squares of Mantova with her students. They took photographs, drew prospective drawings and analysed the main artistic aspects of the squares. Then they collected the material acquired and produced some Power Point presentations that were stored on CD and partially shown at the meeting in Thessaloniki.

All the presentations were really made by the students so they included positive and negative aspects which can be improved in the final part. Considering the work in its whole aspect, some improvements have to be fulfilled. First it is necessary to widen the presentation of the students involved and add further visual information about our school. In addition all the collected material should be rearranged in order to create a whole vision of the area where we live.
